```
/*
  Example of After[ insert/update/delete ] trigger
*/

// 1. Creating two tables
create table Student(rollno int(3));
create table Result(mess varchar(30));

// 2. Create trigger
delimiter //
create trigger aftTrig
  after insert
   on Student
   for each row
        begin
        insert into Result values('Akash');
        end; //
delimiter ;

// 3. Insert record for Student table
insert into Student values(1);

// 4. Data gets automatically inserted into Result table
select * from Result;
```
